## MANAGEMENT DISCUSSION AND ANALYSIS

### Business Review

During the period under review, the Group was principally engaged in the design, development, production and sale of power supply products, especially transformers, switching mode power supplies, and other electronic parts and components. The Group sells its products domestically and to overseas customers. Customers are mainly manufacturers and trading entities.

Most of the power supply products were manufactured and sold under the Group's brand name called "Keen Ocean" while other electronic parts and components were sold on an original equipment manufacturer basis. Among the products sold, transformers remained the Group's best-selling products and represented approximately 56.0% of the Group's sales for the nine months ended 30 September 2018 (nine months ended 30 September 2017: approximately 56.8%). The percentage sales for switching mode power supplies and electronic parts and components represented approximately 1.2% (nine months ended 30 September 2017: approximately 1.0%) and 42.8% (nine months ended 30 September 2017: 42.1%) respectively of the total sales for the nine months ended 30 September 2018.

The recent trade war between US and China create further economic and political instability across the globe. Companies which import Chinese goods to US may face high punitive import tariffs imposed by the customs of US if such goods fall within the sanction list. The directors are of the view that the trade war had no major impact on the operations of the Group during the quarter ended 30 September 2018. The Group will keep an eye on the progress of the trade war and response accordingly.

During the period under review, the business of the Group was again impacted by the high material cost, especially the price of copper and silicone steel. In view of the current unstable environment, the Group expects that copper and silicone steel prices will continue to stay high. The Group has not attempted to hedge against the prices of copper or silicone steel. Nevertheless, if the price continues to rise, the Group will consider all possible methods to alleviate or counteract the increase.

Revenue generated from sales of new products such as high power switching mode power supply, amplifier board and the digital signal processing board increased steadily but was slightly lower than the Group's expectation. The reason may be attributable to uncertain economic and political environment which cause customers cautious in placing their orders.

During the period under review, the Group has completed the development of two new products, namely electric healthcare product and inverter. Orders have been received for the two new products. Some inverters have been shipped to customers starting from September 2018. There was no despatch of electric healthcare products before end of September as customers are still revising the specifications to compile with their countries' safety standards. It is expected that these two new products will start to contribute revenue to the Group in the second half of the year.

During the period, KOS Technology Company Limited (“KOS”), a subsidiary of the Group, issued new shares to an independent third party for consideration of US\$1,800. After the new issue, the independent third party will become owner of 45% shares in the enlarged share capital of KOS. The new shareholder will play an advisory role in the manufacture, promotion and distribution of electrical products under a new brand name in KOS.

The Group has actively launched advertising and marketing campaigns to promote its new and existing products. During the period, the Group has placed advertisements in renowned industrial magazines like the Global Source and participated in trade show held in Germany.

### **Financial Review**

The Group’s revenue increased by approximately HK\$15.0 million, or 13.3%, from approximately HK\$112.0 million for the nine months ended 30 September 2017 to HK\$127.0 million for the nine months ended 30 September 2018. Such increase was primarily due to the increase in selling price and sales of transformers and switching mode power supply. Cost of sales increased by approximately HK\$19.5 million, or 21.6%, from approximately HK\$90.3 million for the nine months ended 30 September 2017 to approximately HK\$109.8 million for the nine months ended 30 September 2018. Such increase was mainly due to the increase in sale revenue as well as the rise in raw material costs, especially prices of copper and silicon steel. The Group recorded a rise in prices of copper and silicon steel by more than 15% and 24% respectively since the beginning of last year. Despite the increase in sales, the Group’s gross profit decreased by approximately HK\$4.6 million, or 21.0%, from approximately HK\$21.7 million for the nine months ended 30 September 2017 to approximately HK\$17.2 million for the nine months ended 30 September 2018. Gross profit margin went down from 19.4% for the nine months ended 30 September 2017 to 13.5% for the nine months ended 30 September 2018. Such drop was again due to the high material costs and labour wages.

Other income decreased by approximately HK\$0.2 million or 16.8% from approximately HK\$0.8 million for the nine months ended 30 September 2017 to approximately HK\$0.7 million for the nine months ended 30 September 2018. Such decrease was mainly due to the decrease in income from sales of scrap materials.

Other gains and losses increased by approximately HK\$0.23 million or 511% from gains of approximately HK\$0.05 million for the nine months ended 30 September 2017 to gains of approximately HK\$0.28 million for the nine months ended 30 September 2018. Such increase in gains was mainly attributable to the appreciation of Renminbi against US dollars during the first six months of 2018 as some of the sales, which were originally billed in Renminbi, were settled in US dollars with the exchange rate agreed at rate on the invoice date instead of payment date.

Selling and distribution expenses increased by approximately HK\$0.3 million or 5.5%, from approximately HK\$4.9 million for the nine months ended 30 September 2017 to approximately HK\$5.2 million for the nine months ended 30 September 2018. Such increase was in line with the increase in sales and more advertising, promotional and sample expenses have been incurred as a result of launching of new products.

Administrative expenses decreased by approximately HK\$1.8 million or 9.1% from approximately HK\$20.2 million for the nine months ended 30 September 2017 to approximately HK\$18.4 million for the nine months ended 30 September 2018. The decrease was mainly due to successful reduction of the Group's overhead expenditures by streamlining its administrative workflows in order to cancel out the high staff cost and welfare expenses.

Finance costs increased by approximately HK\$0.3 million or 31.9% from approximately HK\$1.0 million for the nine months ended 30 September 2017 to approximately HK\$1.3 million for the nine months ended 30 September 2018. The increase was mainly due to the increase in bank interest arising from the increase in short term factoring service, a common type of debtor financing which the Group sells its accounts receivable to the bank at a discount for immediate cash received, as a result of increase in sales.

Income tax expenses decreased by approximately HK\$0.1 million or 100% from approximately HK\$0.1 million for the nine months ended 30 September 2017 to nil for the nine months ended 30 September 2018. Such decrease was mainly due to no provision of profits tax for the Group's operations as a result of losses incurred during the period under review.

As a result of the above, the Group recorded a loss of approximately HK\$6.7 million for the nine months ended 30 September 2018 (nine months ended 30 September 2017: loss of approximately HK\$3.6 million)

## **Prospect**

If the trade war continues, the US government may raise import tariffs and expand its sanction list to cover all Chinese imports. If the Group's products fall within the sanction list, the Group will temporarily reduce its percentage of US sales and exploit other geographic market opportunities. Besides, the continuous rise in copper and silicone steel prices may further reduce the profit margin of the Group's products. Nevertheless, the Group will try its best to work around these issues and hope that any impact that might have brought would be kept to a minimum.

Despite the gloomy economic outlook, the Directors are of the view that the long term prospect of the industries where the Group is operating are still challenging. The Directors have confidence to overcome the current stagnant atmosphere and expand its business by producing more customer-oriented products.

In the short term, apart from promoting the existing products, the Group will continue to develop new products to broaden its product range, upgrade its production capability, solidify relationship with existing customers and widen customer base. More advertisements will be placed in magazines and more overseas trade shows and exhibitions will be taken part in order to promote both new and existing products. The Group aims to strengthen its competitiveness in the market so as to generate sustainable returns and maximize shareholders' return.
